

# Control unit T751

## Technical Data Controller:

- Power supply: 230Vac.
- Clear contact without voltage 16A Max (3500Watt).
- Dimensions: 4 modules DIN, 70x84mm, depth 60mm.
- Sensor features: NTC10K 103-AT.
- Certifications: CE.

## Sensor NTC10K

When there is a temperature sensor (type NTC10K) the operation can be managed using a controller which will activate/ deactivate the heater to achieve the set temperature (0-90°C).

Code	Description
CS00	Heating cable (generic code)
T751	Temperature controller for DIN rail ,relay 16A out (without probe)
T752	Temperature controller for panel (without probe)
T803	NTC10K encapsulated temperature sensor, 1.5 m cable
