THERMAL TECHNOLOGY
CARBON FIBER HEATING

**CLAYSTEEL-S
RADIATOR**

CLAYSTEEL-S RADIATOR

CHARACTERISTICS

- Easy to install, just one suitable plug needed.
- No connection to the water mains.
- No maintenance.
- Highly efficient.
- Even heat distribution.
- No pollution.
- No CO2.

NO HARMFUL ELECTROMAGNETIC EMISSIONS

CERAMIC

The large one-piece natural ceramic covered panel is the key component of the radiator and is protected by a sturdy metal frame. Poor thermal conductivity and large mass allow the heat produced to be stored and gradually released to the surrounding environment. The microporous nature of the ceramic material reduces and dispels excess humidity.

CARBON FIBER

Carbon fiber is flexible, does not oxidize, does not produce harmful electromagnetic fields during electricity flow, has no dimensional variations, as the temperature changes, or deterioration of ohmic values. No wearing and no maintenance necessary. Its high resistivity permits significant energy savings

SPECIAL FEATURES

Easily replaced electronic control unit and extractable temperature sensor with range of up to 3 metres.

Replaceable electronic control unit

Extractable temperature sensor

DESIGN

With fanatical attention paid to even the smallest detail, the stunning design is simply that of a modern work of art.

HEAT REGULATION

The heater has a temperature sensor and electronic control unit, which automatically maintain the desired temperature settings throughout the day. They also regulate power consumption by decreasing the initial consumption from 450W to 225W during the temperature maintenance phase while still providing complete comfort.

MODEL	POWER SUPPLY	POWER RATING	WEIGHT (kg/lb)	DIMENSIONS (cm/in)
TM03.S	230 Vac 50/60 Hz	450/225 W	40/88.18	121.2/47.72 x 61.2/24.09 x 10.2/4.02

This product is manufactured in conformity with the electrical safety standards set by Low Voltage Directive 2014/35/EU. This product is in conformity with Electromagnetic Compatibility Directive 2014/30/EU, concerning the standards for electromagnetic emissions.
