THE NEW GENERATION OF HEAT

# GEMINI RADIATOR

# GEMINI RADIATOR

## CHARACTERISTICS

- Three sizes available.
- Ease of installation, it is sufficient just one electric outlet with adequate supply pressure.
- On/Off switch.
- No connection to the water mains required.
- No maintenance required.
- High efficiency.
- Even heat distribution.
- No pollution.
- No CO2.

## NO HARMFUL ELECTROMAGNETIC EMISSIONS

### BODY

The body is made of fire varnished steel, with Carbon Fiber resistors inserted inside. The use of steel allows an extremely reduced thickness for an installation without problems even in small areas.

### CARBON FIBER

Carbon fiber is flexible, does not oxidize, does not produce harmful electromagnetic fields during electricity flow, has no dimensional variations as the temperature changes nor deterioration of ohmic values. No wearing and no maintenance required. Its high resistivity permits significant energy savings.

### ACCESSORIES

PS06.B – Towel bar made of steel

### TEMPERATURE CONTROL

The unit can be equipped with a wireless thermostat with a receiver mounted on the electrical feeding plug, so to optimize the on/off function in accordance with required ambient temperatures or the pre-programmed temperatures desired at different hours.

## COLORS CHART

The manufacturer reserves the right to change the colors and the technical specifications of the products at any time without notice.

CONFORMITY

This product is manufactured in conformity with the electrical safety standards set by Low Voltage Directive 2014/35/EU. This product is in conformity with Electromagnetic Compatibility Directive 2014/30/EU, concerning the standards for electromagnetic emissions.
