LAUDRY DRIER SUNNY

APPLICATION AREA

Sunny laundry drier guarantees a rapid drying of the laundry hanging on a clotheshorse placed inside the house. Applied between floor and the stand, due to an immediately warming through infrared wave emission, it guarantees a rapid drying of the laundry, in about 3 hours.

NO HARMFUL ELECTROMAGNETIC EMISSIONS

OPERATIONAL FEATURES

Laundry drier Sunny is water and moisture resistant, guaranteeing a maximal safety during exploitation. It is enough to insert the plug into an adequate outlet and the heater gets immediately warm, with a constant yield in time.

SUNNY IS AVAILABLE IN YELLOW AND ORANGE COLORES

CARBON FIBER

Carbon fiber is flexible, does not oxidize, does not produce harmful electromagnetic fields during electricity flow, has no dimensional variations as the temperature changes nor deterioration of ohmic values. No wearing and no maintenance required. Its high resistivity permits significant energy savings.

SUNNY PLACED UNDER THE LAUDRY CLOTHESHORSE

SMALL SIZES OF THE PRODUCT WHEN FOLDED

COMPOSITION

- Orange polyester.
- Adhesive.
- Carbon Fiber resistors between two layers of corrugated aluminium.
- Non-woven polyester.
- Yellow waterproof polyester.

TEMPERATURE CONTROL

Laundry drier is equipped with safety thermostat with a maximal temperature of 80°C.

Safe

Energy saving

Light

Hot in only 5 min.

Safe even if got wet accidentally

MODEL	POWER SUPPLY	POWER	PROTECTION DEGREE	INSULATING DEGREE	TEMPERATURE CONTROL	CABLE (cm/in)	DIMENSIONS (cm/in)
SUNNY	230 Vac 50Hz	550 W	IP67	1	Thermostat of 80°C	Cable length 160/62.99	Unfolded 120/47.24x40/15.75 Folded 40/15.75x40/15.75

CONFORMITY

This product is manufactured in conformity with the electrical safety standards set by Low Voltage Directive 2014/35/EU. This product is in conformity with Electromagnetic Compatibility Directive 2014/30/EU, concerning the standards for electromagnetic emissions.
