

MATIRIA
The Art of Heat

**TYROOL V
RADIATOR**

TYROOL V RADIATOR

CHARACTERISTICS

- Easy to install, just one suitable plug needed.
- No connection to the water mains.
- No maintenance.
- Highly efficient.
- Even heat distribution.
- No pollution.
- No CO2.

NO HARMFULL ELECTROMAGNETIC EMISSIONS

CERAMIC

The ceramic outer shell, which comes in a variety of colours, covers the whole surface. Poor thermal conductivity and large mass allow the heat produced to be stored and gradually released to the surrounding environment. The microporous nature of the ceramic material reduces and dispels excess humidity.

CARBON FIBRE

Carbon fiber is flexible, does not oxidize, does not produce harmful electromagnetic fields during electricity flow, has no dimensional variations, as the temperature changes, or deterioration of ohmic values. No wearing and no maintenance necessary. Its high resistivity permits significant energy savings.

SPECIAL FEATURES

Easily replaced electronic control unit, replaceable ceramic top and extractable temperature sensor with range of up to 3 metres.

Replaceable electronic control unit

Replaceable top

Extractable temperature sensor

DESIGN

With fanatical attention paid to even the smallest detail, the stunning design is simply that of a modern work of art.

HEAT REGULATION

The heater has a temperature sensor and electronic control unit, which automatically maintain the desired temperature settings throughout the day. They also regulate power consumption by decreasing the initial consumption from 700W to 350W during the temperature maintenance period for complete comfort.

| MODEL | POWER SUPPLY | POWER RATING | WEIGHT (kg/lb) | DIMENSIONS (cm/in) |
|--------|------------------|--------------|----------------|-----------------------------------|
| TM01.A | 230 Vac 50/60 Hz | 600/1200 W | 74,00/163.14 | 171 /67.32 x 58 /22.83 x 12 /4.72 |

CONFORMITY

This product is manufactured in conformity with the electrical safety standards set by Low Voltage Directive 2014/35/EU. This product is in conformity with Electromagnetic Compatibility Directive 2014/30/EU, concerning the standards for electromagnetic emissions.
